Choose a platform for your project

This catalogue groups 13 identified outdoor models. App choices describe separate versions. Missing information remains subject to confirmation for the selected model and order.

Product family	Models
Outdoor Smart Locks	13

Configuration

Specify the model, access methods and required app. Confirm firmware, connectivity and any gateway requirements for that version.

Outdoor exposure

Double-sided waterproof and sun-protection designs are specified for this outdoor series. Confirm sealing, mounting, both-side exposure limits and protection documentation. No numeric IP, UV or operating-temperature ratings are supplied.

Installation

Panel dimensions are unspecified. D1 has a pictured 1200 mm pull handle, not an electronic-panel dimension. T1 has a photo-only source sheet and requires technical confirmation. Send door thickness, handing and mounting measurements.

Procurement

Packing values assist freight planning. Carton quantity is not MOQ. Sample cost, MOQ, lead time and documents are confirmed against the selected version.

Access and user counts

Face recognition is optional on the 12 detailed model pages. The listed 10 administrator, 500 regular and 1 duress users are not individual fingerprint, card or face capacities. App platform and remote functions depend on the selected version.

Model resources

Each model has a product page and quote link. Photos, finish variants, feature images and compatible lock-body figures can be reviewed at gwaylock.com/products#category-outdoor-smart-locks.
